

Machined Monolithic Structures

- Sizes 36" X 36" X 12"
- Weight reduction of 98% from solid
- Wall thicknesses to 0.020"
- Compliance to MIL-I-45208A Standards

- Magnesium
- Aluminum
- Lithium
- Ceramics
- Tantalum
- Titanium

Barnes Manufacturing Services specializes in machining lightweight, precision monolithic parts for use in advanced scientific research, aircraft and space projects, and nuclear test components.

Our highly trained staff can assist in the design, development, and production of any project, including integrated optical assemblies and instrument housings for spaceflight and airborne applications. We also offer prototype support during development and qualification of structurally efficient space-flight components.
